Summary

Full-stack developer with hands-on experience building production-ready web applications, REST APIs, and developer tooling using React, Node.js, Java, and Spring Boot. Delivered role-based LMS platforms, e-commerce solutions, and a cross-platform desktop application with CI/CD pipelines, Docker, and GCP. Comfortable working across the full stack — from PostgreSQL schema design to responsive React UIs — with a strong focus on clean architecture, secure authentication (JWT, OAuth), and agile delivery.

Skills

Languages & Frameworks: JavaScript, TypeScript, Java, C, React, Redux, Node.js, Express.js, Spring Boot, HTML5, CSS3, Tailwind CSS, Vite, Electron

Databases & Cloud: PostgreSQL, MongoDB, Supabase, SQLite, GCP, Docker, Netlify, Vercel

Tools & Practices: REST APIs, API Design, Git, GitHub, GitHub Actions, CI/CD, Agile, OAuth, JWT, Browser Extensions, System Design

Experience

Full Stack Web Developer Trainee

02/2026 – Present

SPCL Infotech Services Pvt. Ltd. · Full-time · Remote

- Developed responsive web applications using React.js, Tailwind CSS, HTML, and JavaScript.
- Designed and integrated backend data handling using PostgreSQL for real-world projects.
- Built multiple production-style projects including a hotel booking system, movie rating platform, and e-commerce homepage, gaining end-to-end full-stack exposure.
- Implemented dynamic UI components, form validation, filtering, and interactive rating systems.
- Followed UI/UX best practices to deliver modern, mobile-responsive interfaces.
- Managed source control with GitHub and deployed applications on Netlify and Vercel.

Frontend Developer Intern

02/2026 – 03/2026

Search Point

- Built responsive UI components and improved overall user experience across the platform.
- Integrated third-party APIs into existing product features, improving data connectivity.
- Delivered 3 feature-complete UI modules, reducing time-to-ship on key product pages.
- Received a Verified Achievement Record upon successful completion of the internship.

Projects

TimeStream – Open-Source Developer Activity Tracker

01/2025 – Present

A desktop app that silently tracks coding activity, YouTube tutorials, GitHub visits, and AI sessions, turning them into a beautiful daily insights dashboard. 100% local, zero cloud, zero tracking.

Tech: Electron, Vanilla JS, Tailwind CSS, SQLite, Chrome/Firefox Extension (MV3), GitHub Actions, electron-builder

Link: timestream.netlify.app

- **Impact: TimeStream saved me 1 hour of time searching for same content again and again.**
- Built a full Electron desktop app with a Chrome & Firefox browser extension that silently logs developer activity across GitHub, YouTube, ChatGPT, Claude, and Perplexity.
- Implemented a smart multi-signal scoring algorithm to filter educational YouTube videos, ignoring non-educational content automatically.
- Designed a Timeline view, Analytics dashboard, AI session Learnings view, and full-text Search across all recorded history.
- Persists all data locally in JSON and SQLite – no server, no accounts, no tracking.
- Automated CI/CD via GitHub Actions: validates manifests, packages extensions, and publishes GitHub Releases on

version tags.

Online Learning Platform – Full Stack Web Application

09/2025 – 12/2025

A full-stack role-based learning management system with AI-powered assessment automation.

Tech: React, Node.js, Express.js, PostgreSQL, Docker, GCP, LLM APIs

Link: [online-learning-portal-ten.vercel.app](#)

- **Impact: Automated question extraction from PDFs saved teachers hours of manual question paper creation.**
- Developed a scalable LMS with separate roles for admin, teachers, learners, and parents.
- Implemented role-based authentication and secure RESTful APIs using JWT.
- Built course management, assessments, attendance tracking, and progress analytics features.
- Integrated multiple LLMs (OpenAI, Claude, Gemini, Perplexity) to extract questions from PDFs/images and convert them into structured JSON.
- Designed PostgreSQL schemas for users, courses, tests, and performance data.
- Containerized the application using Docker and deployed on GCP.

Marriage Biodata Builder

07/2025 – 07/2025

A lightweight web app for creating, customizing, and downloading marriage biodata as PDFs.

Tech: React, JavaScript, HTML5, CSS3, jsPDF

Link: [marriage-biodata-builder.vercel.app](#)

- **Impact: Users can create and download a complete biodata PDF in minutes with zero signup or account required.**
- Developed a user-friendly application to create marriage biodata without user registration.
- Implemented dynamic form handling with live preview and template selection.
- Integrated client-side PDF generation using jsPDF for instant biodata download.
- Focused on responsive UI design and smooth cross-device user experience.

SagarShop – E-commerce Web Application with Admin Panel

06/2025 – 07/2025

A full-stack e-commerce platform with an admin dashboard for managing products, orders, and customers.

Tech: React, Node.js, PostgreSQL (Supabase), Tailwind CSS

Link: [sagar-shop.netlify.app](#)

- **Impact: Gave small business owners a single dashboard to manage products, orders, and customers without needing technical knowledge.**
- Implemented product, order, and customer management using REST APIs.
- Integrated PostgreSQL via Supabase for secure data storage and retrieval.
- Deployed the application on Vercel with a fully responsive UI design.

Education

Bachelor of Science (B.Sc.) – Computer Science

03/2023 – 06/2026

Sant Gadge Baba Amravati University

HSC (Higher Secondary Certificate)

03/2022 – 03/2023

Amravati University

Achievements

- **Open-Source Contributor** – TimeStream is publicly available on GitHub, demonstrating end-to-end ownership from architecture to CI/CD release automation.
- **Hacktoberfest 2023 Participant** – Contributed to open-source projects as part of Hacktoberfest 2023, reinforcing collaboration and version-control best practices.
- **Internship Certificate of Achievement** – Received a Verified Achievement Record from Search Point upon successful completion of the Frontend Developer Internship (02/2026 – 03/2026).
