

Internship Task: Movie Listing and Rating Website UI

Task Name:

Movie Listing and Rating Website UI

Duration:

10 Days

Task Description:

The task is to design and develop a responsive website UI that lists movies with essential details such as title, genre, release year, and a rating system. Users should be able to view the list of movies, see details, and rate them. This project will focus on UI/UX design, interactivity, and the ability to handle movie data efficiently.

Objectives:

- Design a visually appealing movie listing page with various movie details.
 - Implement a movie rating system where users can rate movies.
 - Ensure the website is fully responsive and works across different devices.
 - Use GitHub for version control to track progress.
-

Features to Implement:

1. Movie Listing Page:

- Display a grid or list of movies, each including:
 - Movie title
 - Genre(s)
 - Release year
 - Poster/image
 - Rating (could be a star-based rating system)
- Optionally include movie descriptions or trailers on hover or click.

2. Movie Rating System:

- Allow users to rate each movie (e.g., using stars or a number scale from 1 to 5).
- Implement hover effects to show the rating system (highlight stars or numbers on hover).
- Display the average rating for each movie after users submit their ratings.

3. Responsive Design:

- Ensure the layout adapts well to mobile, tablet, and desktop sizes.
- Use CSS grid or flexbox to make the movie listings responsive.

4. Interactive Movie Cards:

- Movie cards should be clickable to show additional details like description, cast, and trailer (optional).
- Use hover effects to highlight movie cards.

5. Search and Filter Options (Optional):

- Provide a search bar to search movies by title.
- Add filters to sort by genre, release year, or rating.

6. Optional Enhancements:

- Include a "Watch Trailer" button on each movie card that opens a modal with the trailer.
- Integrate a pagination system for a large list of movies.

Technology Stack:

- **HTML5**
 - **CSS3** (using frameworks like Bootstrap or Tailwind CSS for responsiveness)
 - **JavaScript** (for interactivity such as rating, hover effects, etc.)
 - **Optional Enhancements:**
 - Use React.js for a dynamic UI.
 - Integrate a movie API (e.g., The Movie Database API) to fetch real movie data (if applicable).
-

Interactive Components:

- Hover effects on movie cards.
 - Rating system with dynamic feedback.
 - Clickable movie cards to reveal additional movie details (description, cast, trailer).
-

Version Control:

- Students must create a repository on GitHub.
 - Commit changes regularly (with meaningful commit messages).
 - Push the final project code to the GitHub repository.
-

Presentation:

- Deploy the project using platforms like GitHub Pages, Netlify, or Vercel.
 - Prepare a brief presentation/demo (5-10 minutes) explaining:
 - Features and interactions on the website.
 - Technologies used in development.
 - Challenges faced and solutions applied.
-

Deliverables:

1. A fully functional movie listing and rating website UI.
 2. Source code pushed to the GitHub repository.
 3. Link to the deployed website.
 4. Documentation (README file) containing:
 - Project Overview.
 - Instructions to run the project.
 - Technologies used.
-

Task Evaluation Criteria:

1. Design Quality: UI/UX, responsiveness, and overall appearance. (25%)
2. Functionality: Movie listing, rating system, and interactivity. (25%)

3. **Code Quality:** Clean, readable, and well-structured code. (20%)
 4. **GitHub Usage:** Proper commits and repository structure. (15%)
 5. **Presentation/Demo:** Clear explanation of work and project deployment. (15%)
-

Tools and Resources:

- **Code Editors:** VS Code, Sublime Text, etc.
 - **Version Control:** Git and GitHub
 - **CSS Frameworks:** Bootstrap or Tailwind CSS
 - **Deployment Platforms:** GitHub Pages, Netlify, Vercel
 - **Design References:** Figma, Canva, or Dribbble for UI inspiration
 - **Movie Data (Optional):** The Movie Database API or OMDB API
-

Deadline:

The task must be submitted within 10 days from the date of assignment.
