

Internship Task: Personal Finance Tracker Web App

Task Name:

Personal Finance Tracker (Expense & Budget Manager)

Duration:

15 Days

Task Description:

Design and develop a responsive Personal Finance Tracker web application that allows users to manage daily expenses, set budgets, and visualize spending patterns. The application should focus on usability, interactivity, and clean UI using HTML, CSS, and JavaScript.

Objectives:

- Build a practical, real-world web application.
- Implement dynamic UI updates using JavaScript.
- Practice data handling using browser storage (LocalStorage).
- Ensure responsive and user-friendly design.

Features to Implement:

1. Page Layout:

- Clean and modern dashboard layout.
- Sections: Header, Summary Cards, Expense Form, Expense List, Charts Section.

2. Expense Management:

- Add new expenses (Title, Amount, Category, Date).
- Display list of expenses dynamically.
- Edit and delete functionality for each entry.

3. Budget Management:

- Allow user to set a monthly budget.
- Show remaining budget dynamically.

4. Data Persistence:

- Store all data using LocalStorage.
- Ensure data remains after page refresh.

5. Category Filtering:

- Filter expenses by category (Food, Travel, Shopping, etc.).

6. Search Functionality:

- Search expenses by name or category.

7. Basic Data Visualization:

- Create simple charts (using JS or chart library) to show spending distribution.

8. Responsive Design:

- Fully responsive for mobile, tablet, and desktop.

9. Performance Optimization:

- Optimize DOM updates.
- Use efficient event handling.

10. Optional Features:

- Dark/Light mode toggle.
- Export data as CSV.
- Add animations or transitions.

Technology Stack:

Frontend:

- HTML5
- CSS3 / Tailwind / Bootstrap
- JavaScript (ES6+)

Version Control:

- Create a GitHub repository.
- Maintain proper commits with meaningful messages.
- Push final code regularly.

Presentation:

- Deploy using GitHub Pages / Netlify / Vercel.

- Prepare a 5–10 minute demo including:

- Project overview
- Features demonstration
- Challenges faced
- Future enhancements

Deliverables:

1. Fully functional Finance Tracker Web App
2. GitHub repository link
3. Live deployed link
4. README file including:
 - Project overview
 - Setup instructions
 - Technologies used

Task Evaluation Criteria:

1. UI/UX & Design (25%)
2. Functionality (30%)
3. Code Quality (20%)
4. Data Handling (15%)
5. GitHub & Presentation (10%)

Tools and Resources:

- Code Editors: VS Code, Sublime Text
- Version Control: Git, GitHub
- Optional Libraries: Chart.js
- Deployment: Netlify, Vercel, GitHub Pages

Deadline:

The task must be completed and submitted within 15 days from the date of assignment.
